Computer Science graduate with production experience building full-stack web applications and CRM systems for real businesses using React, Node.js, and SQL/NoSQL databases. Skilled in designing scalable data models, REST APIs, and front-end interfaces, taking features from requirements through deployment.

Experience

ABIS Foods Pvt. Ltd.

May 2025 – Sep 2025

Full-Stack Software Developer Intern | [\[certificate\]](#)

Rajnandgaon, CG

- Contributed to the core development of 4 production CRM and ERP modules, designing **database schemas**, **REST APIs**, and **React** interfaces within a shared multi-tenant architecture; maintained API contracts used by internal teams.
- Designed **role-based access control** supporting 20+ permission levels for **200+ sales and marketing users**, and built an automated round-robin lead assignment pipeline processing **~3,000 leads daily**.
- Built an **offline-first** ERP workflow with geo-fenced check-ins, using **IndexedDB** to preserve user activity during connectivity loss and automatically synchronize data on reconnection; added a **WebSocket**-powered dashboard for real-time operational visibility.
- Integrated **VoIP/IVR** capabilities into the CRM to support concurrent call queues and automated call workflows, reducing average call handling time by **~30%** and enabling faster customer resolution.
- Integrated **WhatsApp Business API** webhooks and **SAP ERP** data into a unified B2B support interface, reducing average response time from hours to minutes.

Projects

Technorollix | [\[live\]](#) | [\[source code\]](#) | Next.js, TypeScript, React, Node.js, MongoDB, AWS

Mar 2025

- Built an event management platform that replaced fragmented Google Forms workflows with a centralized system for event registration, information, payments, accommodation, and participant management across **42+ events**.
- Implemented **server-side pagination** and **streaming Excel exports** to handle large participant datasets without loading entire record sets into memory, maintaining dashboard responsiveness for **~2,500 registered users** over a month.
- Designed reusable **role-based authorization** for students, event managers, and administrators, providing controlled access to registrations, participant data, and event information without duplicating permission checks across routes.

Network-Next | [\[source code\]](#) | [\[certificate\]](#) | React, Express, Socket.io, MongoDB, JWT, Razorpay, Tailwind CSS

Dec 2024

- Led frontend development for a **6-member team** building an alumni networking and mentorship platform during **Smart India Hackathon** to address the lack of connection between students and alumni, integrating **real-time chat**, video calling, mentor matching, and payments.
- Designed a preference-based **mentor-matching system** using a scoring function over profile attributes, iterating on matching logic based on user requirements to improve the relevance of mentor recommendations.
- Developed the platform as a scalable hackathon solution that was later **handed over to the university** for continued development and use.

Skills

Languages: C/C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, Webhooks

Databases & ORM: MySQL, MongoDB, Sequelize, Mongoose, IndexedDB

CS Concepts: Data Structures & Algorithms, OOP, complexity analysis, Relational Schema Design, System Design

Tools: Git, GitHub, Docker, AWS (EC2, S3), Postman, Jest, Linux

Education

OP Jindal University

Aug 2022 - May 2026

Bachelor of Technology in Computer Science | **CGPA: 8.4/10**

Raigarh, CG

Achievements

- Bronze Medal** - East Regional Skill India Competition 2026, Web Technologies track; competed against participants from **6+ states**. [\[certificate\]](#)
- Event Management Lead**, Hacksprint 2025 – led complete execution of a **30-hour hackathon** for **120+ participants**, coordinating logistics and judge operations for OP Jindal University's annual fest.
